Quarterly Economic Outlook for FY2020-2021 (Update)

September 8, 2020(JST), “SMBC NIKKO Japan Economic Outlook for FY2020-2021” has been released, responding to the second preliminary of GDP (April-June 2020 period)

Economy to Recover as CV19 Threat Eases

- ◆ Real GDP: FY20 -6.2%, FY21 +4.8%
- ◆ Nominal GDP: FY20 -6.2%, FY21 +5.1%

Summary**• GDP growth outlook**

We revise our outlook to reflect the second preliminary Apr-Jun 2020 GDP data. We forecast real GDP growth of -6.2% YoY in FY20 and +4.8% in FY21, down 0.2ppt for FY20 from our previous estimates (as of 20 Aug). This reflects the downward revision to capex in the second preliminary GDP estimate. We still expect the domestic economy to recover from Jul-Sep.

- **Economic outlook**

We expect Japan's economy will trace a V-shaped recovery from a major bottom in Apr-Jun. The drivers of this will be recoveries from major slumps in private consumption and exports.

Private consumption: Consumer sentiment is improving and mobility has recovered to pre-Covid levels. Consumption of goods has also returned to pre-Covid levels and there has been a clear rebound in consumption of services located close to the home, such as restaurants and short-haul rail travel. By contrast, the pace of recovery is slow for lodgings and air travel. We think this reflects data from before the removal of requests to refrain from cross-prefectural travel, and we expect the removal of these requests will result in a gradual shift in behavior. The government's "Go To Travel" campaign should also stimulate consumption, fueling demand. Meanwhile, increased savings should also bolster consumption. Household savings have nearly tripled during the pandemic as households curtailed spending. We think the recovery in sentiment and ample savings should be enough to fuel a self-sustained recovery in consumption.

Exports: The plunge in exports reflects a sharp fall in auto exports to the US and Europe. Recently though, auto sales in the US and Europe have rebounded sharply as lockdowns are lifted. Sales still trail potential demand, so could go much higher. We expect auto sales to lead Japanese exports out of their slump.

- **Threat of 2nd wave of Covid-19**

While the number of new cases is rising sharply, mobility and share price levels have regained pre-Covid levels, suggesting people and markets are not overly concerned with the threat. The rise in case count is likely a function of increased PCR testing, while the easing of testing requirements has also likely boosted the capture rate. The true gauge of whether the virus is spreading is the effective reproduction number, which is currently below 1, suggesting the outbreak is subsiding. We expect the number of positive cases will decline gradually as the infectivity of the virus weakens, and the virus becomes inactive about 10 days after infecting a host, including in as yet undetected cases. Meanwhile, the case fatality rate remains low, at 0.65% in Jul-Aug, or around one-quarter of the level in April. The number of fatalities per capita is two orders of magnitude lower than in the US and Europe.

The effective reproduction number and case fatality rate in Japan suggest the threat of a 2nd wave of the virus is not all that large. Japan should be able to resume normal social and economic activities, provided sufficient care is paid to outbreaks among the elderly.

As economic activity resumes, we think Japan could experience something near to a V-shaped recovery. We expect real GDP in Jan-Mar 2021 will be around 96.7% of the pre-Covid (Oct-Dec 2019) level.

###

Important notes concerning Article 37 of the Financial Instruments and Exchange Act (Advertising Regulations, etc.)

Commissions (below figures do not apply to certain customers, such as non-residents in Japan and professional investors under FIEA, for whom commissions are set on an individual basis)

When a trade is executed based on information contained in this research report, a predetermined brokerage commission may be charged. For example, when an order is placed at a branch to buy or sell a stock or other security on a securities exchange in Japan (with the exception of odd-lot remainders), a commission of up to a maximum of 1.265% of the contract settlement amount (Note: The minimum commission is 5,500 yen) is charged to the client for each product trade executed. Clients will only be charged for the purchase price of a bond, stock or other security in trades executed as part of a primary offering, secondary distribution, or with a counterparty (Note: In the case of bonds, the trade may require that the client pay accrued interest if separate from the purchase price). For trades involving products denominated in foreign currencies, an exchange of products denominated in yen and another currency, or an exchange of products denominated in different currencies, the applicable exchange rate will be determined by SMBC NIKKO. For fees mentioned above that are subject to consumption tax, the rates and amounts include the consumption tax portion.

Risks

Each product entails the risk of a partial loss of the amount of invested capital (the risk of a partial loss of principal) or a loss equal to or greater than the amount of invested capital (the risk of a loss equal to or exceeding principal) due to a variety of factors, which may include price variance and fluctuations in stock markets, interest rates, exchange rates, real estate markets, and commodity markets, and deterioration in the creditworthiness (including the financial and management condition) of issuers of securities. When executing margin or derivative transactions ("derivatives"), there is a risk the amount of derivatives transaction exposure could exceed the client's margin collateral or margin deposit ("margin collateral amount"), and there is also a risk of loss exceeding the client's margin collateral should prices of securities or values of indexes underlying such transactions fluctuate (the risk of a loss equal to or exceeding principal). When executing over-the-counter derivative transactions, there may be a spread between the ask and bid prices on financial instruments quoted by SMBC NIKKO. For asset-backed securities, interest, dividends, repayment of principal and other elements may be affected by changes in conditions in certain assets. Such changes may result in losses relating to early sale or redemption of such assets.

Aforementioned commissions and risks differ by financial instrument and clients should carefully examine all relevant documentation, including documentation delivered prior to execution, prospectuses, and other material provided. Clients may contact any SMBC NIKKO branch for questions regarding such documentation.

Company Name

SMBC Nikko Securities Inc. is a financial instruments dealer governed by the Financial Instruments and Exchange Act, registered with the Kanto Local Finance Bureau, Registration No. 2251.

Member Associations

SMBC Nikko Securities Inc. is a member of the Japan Securities Dealers Association, the Japan Investment Advisers Association, The Financial Futures Association of Japan and the Type II Financial Instruments Firms Association.
